

TWS connection methods:

1. Point to point connection

2. Multi-points connection

OD-975 (TWS) User Manual

I. Point to point connection

1. Turn on one of the two speakers (main speaker) and press “” remote to select Bluetooth mode
2. Enable Bluetooth on your mobile, search the speaker name “PURE OD975” and connect (once speaker is connected with one mobile device, it cannot be discovered by other mobile devices)
3. Turn on another speaker (secondary speaker) and press “” remote to select Bluetooth mode
4. Long press “TWS” button on remote for 3 seconds towards both two speakers one after another until you hear “dudu” sound from both speakers. Once two speakers are successfully paired, a “di” sound will be heard

Remarks: Once the two speakers are successfully paired, the system will memorize and set to auto pairing mode if the units are restarted. A “di” sound will be heard if auto pairing is successful. (You will just need to repeat above 1-3, because the secondary speaker will be paired to the main speaker automatically after it’s tuned on).

5. You can play with two speakers as left and right channels.
6. Two speakers will be re-paired automatically once restart the two units and the main speaker will be re-connected with the last mobile device that been connected before speakers are turned off.

Remarks:

1. If need to connect with a new mobile device, it will require the previous mobile device to disconnect with the main speaker by either short pressing “TWS” button on remote or disconnecting the main speaker on Bluetooth setting of the mobile device .
2. If the previous mobile device is beyond the Bluetooth working distance, the main speaker can also be discovered and connected by the new mobile device after 1 minute.

II. Multi-points connection

1. Turn on one of the two speakers (speaker 1) (and press “” remote to select Bluetooth mode
2. Enable Bluetooth on mobile 1, search speaker 1 name “PURE OD975” and connect (once speaker is connected with one mobile device, it cannot be discovered by other mobile devices)

3. Turn on another speaker (speaker 2) and press “” remote to select Bluetooth mode

4. Enable Bluetooth on mobile 2, search speaker 2 name “PURE OD975” and connect (once speaker is connected with one mobile device, it cannot be discovered by other mobile devices)

5. Long press “TWS” button on remote for 3 seconds towards both two speakers one after another until you hear “dudu” sound from both speakers. Once two speakers are successfully paired, a “di” sound will be heard

Remarks: Once the two speakers are successfully paired, the system will memorize and set to auto pairing mode if the units are restarted. A “di” sound will be heard if auto pairing is successful. (You will just need to repeat above 1-4, because speaker 2 will be paired to speaker 1 automatically after it’s tuned on).

6. Either mobile 1 or mobile 2 can play with two speakers as left and right channels

7. Two speakers will be re-paired automatically once restart the two units and the two speakers will be re-connected with the last mobile devices that been connected before speakers are turned off.
